

# Brendan M. O'Connor

NEIL GEHRELS PRIZE POSTDOCTORAL FELLOW · UNIVERSITY OF MARYLAND, COLLEGE PARK

✉ [oconnorb@umd.edu](mailto:oconnorb@umd.edu) | 🌐 [brendanoc95.wixsite.com/brendanoconnor](https://brendanoc95.wixsite.com/brendanoconnor)

## Professional Experience

---

- Sep. 2026 - present **Neil Gehrels Prize Postdoctoral Fellow**, Joint Space-Science Institute – Department of Astronomy, University of Maryland, College Park & Astrophysics Science Division, NASA Goddard Space Flight Center (GSFC)
- 2023 - 2026 **McWilliams Postdoctoral Fellow**, Carnegie Mellon University, Department of Physics & The McWilliams Center for Cosmology and Astrophysics
- 2019 - 2023 **Faculty Assistant**, Department of Astronomy, University of Maryland, College Park
- 2019 - 2023 **Research Assistant**, Astrophysics Science Division, NASA Goddard Space Flight Center (GSFC)

## Education

---

### The George Washington University

PHD PHYSICS – GPA: 4.0

- Advisors: Chryssa Kouveliotou, Eleonora Troja, and Brad Cenko
- Thesis: The Transient Universe: Compact Objects Near and Far

Washington, DC

August 2017 - August 2023

### The George Washington University

MPHIL PHYSICS – GPA: 4.0

Washington, DC

August 2017 - May 2020

### The George Washington University

MS PHYSICS – GPA: 4.0

Washington, DC

August 2017 - January 2020

### Union College

BS PHYSICS – GPA: 3.8 (*summa cum laude*)

- Minor in Astrophysics
- Thesis: Colliding Wind Binaries with Orbital Motion; Advisor: Francis Wilkin

Schenectady, NY

August 2013 - June 2017

## Research Interests

---

- Gamma-ray bursts and their host galaxies and environments
- Fast X-ray Transients, X-ray Flashes, and Explosive Transients
- Gravitational waves and multimessenger astrophysics
- Neutron star mergers and kilonovae
- Galactic X-ray transients: magnetars, cataclysmic variables, high-mass X-ray binaries
- Surveys and serendipitous ultraviolet, optical, infrared, or high-energy transients

My research has mainly focused on using the following telescopes and observatories:

- **X-rays:** *Swift*/XRT, *NICER*, *NuSTAR*, *Chandra*, *XMM-Newton*, *Einstein Probe*
- **Ultraviolet/optical/infrared:** *Hubble Space Telescope (HST)*, *James Webb Space Telescope (JWST)*, Gemini Observatories, Dark Energy Camera (DECam), Southern African Large Telescope (SALT), Lowell Discovery Telescope (LDT), Fraunhofer Telescope Wendelstein (FTW), Dark Energy Spectroscopic Instrument (DESI)

## Publications

---

ORCID: <https://orcid.org/0000-0002-9700-0036>

As of July 1, 2026: I have published 17 first-author, 10 second-author, and 8 third-author publications. My first author publications have > 380 citations. I have authored or co-authored 83 publications which have > 2120 citations. My h-index is 25.

#### FIRST AUTHOR (SORTED BY YEAR)

1. **O'Connor, B.**, Busmann, M., Freeburn, J., Hu, L., Klingler, N., Gruen, D., Andreoni, I., et al., 2026. *Discovery of a Supernova Following the Einstein Probe Transient EP250302a at  $z = 1.131$* . Submitted to ApJ.
2. **O'Connor, B.**, Hall X., Busmann, M., Gruen, D., Floris, A., Cabrera, T., Zhu, Z., et al., 2026. *EP260321a/SN 2026gzf: The Faintest Shock Breakout Associated with a Broad-Lined Supernova*. ApJL, 1006, L13. doi:10.3847/2041-8213/ae84ba
3. **O'Connor, B.**, Busmann M., Hall, X., Taguchi, K., Tanaka, M., Gruen, D., Toshikage, S., et al., 2026. *GRB 260310A/SN 2026fgk: Photometric and Spectroscopic Evolution of a Nearby GRB-Supernova and an Exceptionally Bright Afterglow at  $z=0.153$* . ApJ, 1006, 210. doi:10.3847/1538-4357/ae878f
4. **O'Connor, B.**, Hall, X. J., Cabrera, T., Hu, L., Palmese, A., et al., 2026. *SN 2025adpq: A Type Ia supernova in a collisional ring formed during a major galaxy merger*. The Open Journal of Astrophysics. doi:10.33232/001c.163422
5. **O'Connor, B.**, Ricci, R., Troja, E., Palmese, A., Yang, Y.-H., et al., 2025. *AT2025ulz and S250818k: Deep X-ray and radio limits on off-axis afterglow emission and prospects for future discovery*. ApJL, 995, L47.
6. **O'Connor, B.**, Gill, R., DeLaunay, J., Hare, J., Pasham, D., et al., 2025. *Comprehensive X-ray Observations of the Exceptional Ultra-long X-ray and Gamma-ray Transient GRB 250702B with Swift, NuSTAR, and Chandra: Insights from the X-ray Afterglow Properties*. ApJL, 994, L17.
7. **O'Connor, B.**, Beniamini, P., Troja, E., Busmann, M., Dichiaro, S., et al., 2025. *The redshift distribution of Einstein Probe transients supports their relation to gamma-ray bursts*. ApJL, 993, L37.
8. **O'Connor, B.**, Pasham, D., Andreoni, I., Hare, J., Beniamini, P., et al., 2025. *Characterization of a peculiar Einstein Probe transient EP240408a: an exotic gamma-ray burst or an abnormal jetted tidal disruption event?*. ApJL, 979, L30.
9. **O'Connor, B.**, Beniamini, P., and Gill, R., 2024. *X-ray Afterglow limits on the viewing angles of short gamma-ray bursts*. MNRAS, 533, 1629.
10. **O'Connor, B.**, Kouveliotou, C., Evans, P. A., Gorgone, N., van Kooten, A. J., et al., 2023. *The Swift Deep Galactic Plane Survey (DGPS) Phase-I Catalog*. ApJS, 269, 49. [VizieR/J/ApJS/269/49](https://ui.adsabs.org/2023ApJS...269...49O)
11. **O'Connor, B.**, Brink, J., Buckley, D. A. H., Mukai, K., Kouveliotou, C., et al., 2023. *Identification of 1RXS J165424.6-433758 as a Polar Cataclysmic Variable*. ApJ, 957, 89.
12. **O'Connor, B.**, Göğüş, E., Hare, J., Mukai, K., Huppenkothen, D., et al., 2023. *Swift Deep Galactic Plane Survey classification of Swift J170800-402551.8 as a candidate intermediate polar cataclysmic variable*. MNRAS, 525, 5015
13. **O'Connor, B.**, Troja, E., Ryan, G., Beniamini, P., et al., 2023. *A structured jet explains the extreme GRB 221009A*. **Science Advances**, 9, eadi1405. [10.1126/sciadv.adi1405](https://doi.org/10.1126/sciadv.adi1405)
14. **O'Connor, B.**, Troja, E., Dichiaro, S., Beniamini, P., et al., 2022. *A deep survey of short GRB host galaxies over  $z \sim 0 - 2$ : implications for offsets, redshifts, and environments*. MNRAS, 485, 4890
15. **O'Connor, B.**, Göğüş, E., Huppenkothen, D., Kouveliotou, C., et al., 2021. *Identification of an X-Ray Pulsar in the BeXRB System IGR J18219-1347*. ApJ, 927, 139
16. **O'Connor, B.**, Troja, E., Dichiaro, S., Chase, E. A., et al., 2021. *A tale of two mergers: constraints on kilonova detection in two short GRBs at  $z \sim 0.5$* . MNRAS, 502, 1279
17. **O'Connor, B.**, Beniamini, P., & Kouveliotou, C. 2020. *Constraints on the circumburst environments of short gamma-ray bursts*. MNRAS, 495, 4782

#### CO-AUTHOR – STUDENT LED (SORTED BY AUTHOR POSITION)

\*Undergraduate Student \*\*Graduate Student

1. Skobe, H.\*\*, **O'Connor, B.**, Palmese, A., et al., 2026. *The host galaxies and merger environments of short and long gamma-ray bursts producing kilonovae*. Submitted.
2. Busmann, M.\*\*, **O'Connor, B.**, Sommer, J.\*\*, Gruen, D., et al., 2025. *The curious case of EP241021a: Unraveling the mystery of its exceptional rebrightening*. A&A, 701, A225.

3. Kaur, R.<sup>\*</sup>, **O'Connor, B.**, Palmese, A., Kunnumkai, K. 2026. *Detecting prompt and afterglow jet emission of gravitational-wave events from LIGO/Virgo/KAGRA and next-generation detectors*. ApJ, 1000, 74.
4. Freeburn, J.<sup>\*\*</sup>, **O'Connor, B.**, Cooke, J., Dobie, D., et al., 2025. *GRB 220831A: a hostless, intermediate Gamma-ray burst with an unusual optical afterglow*. MNRAS, 537, 2061. doi:10.1093/mnras/staf147
5. Kunnumkai, K.<sup>\*\*</sup>, Palmese, A., **O'Connor, B.**, et al., 2026. *Wide Jets or Low Rates: Reconciling Short GRB and Gravitational-Wave Neutron Star Merger Rates*. Submitted.
6. Hall, X.<sup>\*\*</sup>, Palmese, A., **O'Connor, B.**, Gruen, D., et al., 2026. *AT2025ulz and S250818k: Leveraging DESI Spectroscopy in the Hunt for a Kilonova Associated with a Subsolar-mass Gravitational-wave Candidate*. ApJL, 1001, L20.
7. Carney, J.<sup>\*\*</sup>, Andreoni, I., **O'Connor, B.**, Freeburn, J., Skobe, H.<sup>\*\*</sup>, et al., 2025. *Optical/infrared observations of the extraordinary GRB 250702B: a highly obscured afterglow in a massive galaxy consistent with multiple possible progenitors*. ApJL, 994, L46.
8. Srinivasaragavan, G.<sup>\*\*</sup>, Perley, D., Ho, A., **O'Connor, B.**, et al., 2025. *Multi-Wavelength Analysis of AT 2023sva: a Luminous Orphan Afterglow With Evidence for a Structured Jet*. MNRAS. doi:10.1093/mnras/staf290
9. Cabrera, T.<sup>\*\*</sup>, Palmese, A., Hu, L., **O'Connor, B.**, et al., 2024. *Searching for electromagnetic emission in an AGN from the gravitational wave binary black hole merger candidate S230922g*. PhRvD, 110, 123029. doi:10.1103/PhysRevD.110.123029

## Awards, Fellowships, & Grants

---

### AWARDS

2021 **Berman Award for Excellence in Experimental Physics**, The George Washington University

### FELLOWSHIPS

- 2026 **Neil Gehrels Prize Postdoctoral Fellowship**, Joint Space-Science Institute at University of Maryland, College Park & NASA GSFC
- 2023 **McWilliams Postdoctoral Fellowship**, Carnegie Mellon University
- 2016 **Davenport Research Fellowship**, Union College
- 2013-2017 **Presidential Scholarship**, Union College

#### ACADEMIC HONOR SOCIETIES

- 2017 **Phi Beta Kappa**, Union College
- 2017 **Sigma Xi**, Union College
- 2016 **Sigma Pi Sigma**, Union College
- 2016 **The Order of Omega**, Union College

#### GRANTS (PI AWARDS >\$500,000)

|      |                                                                                                                      |           |
|------|----------------------------------------------------------------------------------------------------------------------|-----------|
| 2025 | <b>Chandra Cycle 27 Award (PI: B. O'Connor)</b> , Smithsonian Astrophysical Observatory (SAO)                        | \$105,000 |
| 2024 | <b>Chandra Cycle 26 Award (PI: B. O'Connor)</b> , Smithsonian Astrophysical Observatory (SAO)                        | \$64,000  |
| 2023 | <b>Chandra Cycle 25 Award (PI: B. O'Connor)</b> , Smithsonian Astrophysical Observatory (SAO)                        | \$56,755  |
| 2022 | <b>Chandra Cycle 24 Award (PI: B. O'Connor)</b> , Smithsonian Astrophysical Observatory (SAO)                        | \$65,209  |
| 2021 | <b>Chandra Cycle 23 Award (PI: B. O'Connor)</b> , Smithsonian Astrophysical Observatory (SAO)                        | \$66,792  |
| 2023 | <b>Hubble Space Telescope Cycle 31 Award; GO-17583 (PI: B. O'Connor)</b> , Space Telescope Science Institute (STScI) | \$55,367  |
| 2023 | <b>Hubble Space Telescope Cycle 31 Award; GO-17492 (PI: B. O'Connor)</b> , Space Telescope Science Institute (STScI) | \$55,208  |
| 2023 | <b>McWilliams/PSC Seed Grant (PI: B. O'Connor)</b> , <i>Renewing the connection between CMU and SALT</i>             | \$30,000  |

#### Approved Telescope Proposals

As of April 1, 2026: I am PI of 46 approved telescope proposals with a total financial award of \$500,000. I was involved in an additional 129 approved proposals as Co-I, for a total of 172 approved programs overall.

These proposals have been awarded time on the following telescopes and observatories:

*JWST, HST, Chandra, NuSTAR, XMM-Newton, NICER, Swift, Fermi, Gemini, Keck, VLT, VST, FTW, LDT, LBT, GTC, SALT, SOAR, Subaru, DECam, NEWFIRM, VLA, ATCA, NOEMA, uGMRT, e-MERLIN, EVN, GBT.*

As PI I have been awarded > 2 Ms of observing time, including 700 ks of *Chandra*, 59 orbits (320 ks) of *HST*, 129 hr (464 ks) of Gemini, and 83 hr (299 ks) of VLA.

#### AS PRINCIPAL INVESTIGATOR (SORTED BY OBSERVATORY)

1. **JWST Cycle 5 Director's Discretionary Time**, The first nebular phase spectrum of a broad-lined supernova with JWST– Awarded 8.4 hr DD-12767
2. **HST Cycle 31**, Understanding the Hubble tension and jet physics through joint electromagnetic and gravitational wave observations of a neutron star merger – Awarded 28 orbits (2 ToO triggers of 5 epochs each) GO-17583
3. **HST Cycle 31**, Zooming in on the locations of short gamma-ray bursts – Awarded 31 orbits for 22 targets GO-17492
4. **Chandra Director's Discretionary Time**, Constraining the late-time X-ray behavior of the ultralong X-ray transient EP250702a – Awarded 30 ks to study EP250702a. 26409056
5. **Chandra Director's Discretionary Time**, Unraveling the mystery of the fast X-ray transient EP250302a – Awarded 20 ks to study EP250302a. 26409032
6. **Chandra Cycle 27**, Uncovering the late-time X-ray behavior of Einstein Probe Transients – Awarded 160 ks (4 ToOs) 27400339
7. **Chandra Cycle 26**, An off-axis view of compact binary mergers – Awarded 250 ks of *Chandra* and 18 hr of VLA as a joint program 26400095

|     |                                                                                                                                                                   |                 |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 8.  | <b>Chandra Cycle 25</b> , The collimation and energetics of short GRBs: searching for jet-breaks with <i>Chandra</i> – Awarded 80 ks (2 ToOs)                     | 25400257        |
| 9.  | <b>Chandra Cycle 24</b> , The collimation and energetics of short GRBs: searching for jet-breaks with <i>Chandra</i> – Awarded 80 ks (2 ToOs)                     | 24400201        |
| 10. | <b>Chandra Cycle 23</b> , The collimation and energetics of short GRBs: searching for jet-breaks with <i>Chandra</i> – Awarded 80 ks (2 ToOs)                     | 23400418        |
| 11. | <b>XMM-Newton Director’s Discretionary Time</b> , Awarded 100 ks to study GRB 230307A.                                                                            |                 |
| 12. | <b>NuSTAR Director’s Discretionary Time</b> , Awarded 40 ks to study EP240408A.                                                                                   |                 |
| 13. | <b>VLA 2026A</b> , VLA Monitoring of the Jetted TDE Candidate EP240408a – Awarded 11 hr                                                                           | VLA/26A-381     |
| 14. | <b>VLA 2026A &amp; 2026B</b> , An off-axis view of compact binary mergers – Awarded 18 hr ToO                                                                     | VLA/26A-118     |
| 15. | <b>VLA 2025A &amp; 2025B</b> , An off-axis view of compact binary mergers – Awarded 18 hr ToO                                                                     | VLA/25A-267     |
| 16. | <b>VLA 2024A &amp; 2024B</b> , An off-axis view of compact binary mergers – Awarded 18 hr ToO                                                                     | VLA/24A-320     |
| 17. | <b>Gemini-North 2026B</b> , Uncovering the Peculiar Outflows of a Rare Einstein Probe Transient: Connecting FBOTs and FXTs – Awarded 2.7 hr of Standard ToO       | GN-2026B-FT-203 |
| 18. | <b>Gemini-South 2026B</b> , Uncovering the Peculiar Outflows of a Rare Einstein Probe Transient: Connecting FBOTs and FXTs – Awarded 2.7 hr of Standard ToO       | GS-2026B-FT-203 |
| 19. | <b>Gemini-South Director’s Discretionary Time 2026A</b> , Gemini Spectroscopy to Identify the Progenitor of GRB 260310A – Awarded 3.2 hr of Rapid ToO             | GN-2026A-DD-102 |
| 20. | <b>Gemini-South 2026A</b> , Illuminating the Cosmic Forge: Short GRBs as Tracers of Heavy Element Production Across the Universe – Awarded 5.9 hr of Standard ToO | GS-2026A-Q-241  |
| 21. | <b>Gemini-North 2025B</b> , Uncovering the Peculiar Outflows of a Rare Einstein Probe Transient: Connecting FBOTs and FXTs – Awarded 2.2 hr of Standard ToO       | GN-2025B-FT-104 |
| 22. | <b>Gemini-South 2025B</b> , Uncovering the Peculiar Outflows of a Rare Einstein Probe Transient: Connecting FBOTs and FXTs – Awarded 2.2 hr of Standard ToO       | GS-2025B-FT-104 |
| 23. | <b>Gemini-North 2025A</b> , Capitalizing on the End of the LIGO/Virgo O4 Run – Awarded 6 hr of Rapid ToO                                                          | GN-2025A-FT-114 |
| 24. | <b>Gemini-North 2025A</b> , Uncovering the Peculiar Outflows of a Rare Einstein Probe Transient: Connecting FBOTs and FXTs – Awarded 2.2 hr of Standard ToO       | GN-2025A-FT-111 |
| 25. | <b>Gemini-South 2025A</b> , Uncovering the Peculiar Outflows of a Rare Einstein Probe Transient: Connecting FBOTs and FXTs – Awarded 2.2 hr of Standard ToO       | GS-2025A-FT-111 |
| 26. | <b>Gemini-North Director’s Discretionary Time 2025A</b> , Gemini Observations of the Fast X-ray Transient EP250302a – Awarded 4 hr of Rapid ToO                   | GN-2025A-DD-104 |
| 27. | <b>Gemini-North 2024B</b> , Rapid Gemini and Hubble Space Telescope Observations of a kilonova – Awarded 12 hr of Rapid ToO                                       | GN-2024B-Q-136  |
| 28. | <b>Gemini-South 2024B</b> , Rapid Gemini and Hubble Space Telescope Observations of a kilonova – Awarded 20.5 hr of Rapid ToO                                     | GS-2024B-Q-132  |
| 29. | <b>Gemini-North 2024B</b> , Searching for gold: identification of the true counterpart via host galaxy spectroscopy – Awarded 8.5 hr of Standard ToO              | GN-2024B-Q-137  |
| 30. | <b>Gemini-South Director’s Discretionary Time 2024A</b> , Unravelling the mystery of the fast X-ray transient EP240408A – Awarded 4.1 hr of Rapid ToO             | GS-2024A-DD-104 |
| 31. | <b>Gemini-South Director’s Discretionary Time 2023A</b> , The distance and energetics of the second brightest GRB of all time – Awarded 3 hr of Rapid ToO         | GS-2023A-DD-104 |
| 32. | <b>Gemini-North 2023A</b> , Identifying the fingerprints of r-process heavy metals in a short GRB – Awarded 9.5 hr of Rapid ToO                                   | GN-2023A-Q-131  |
| 33. | <b>Gemini-South 2023A</b> , Identifying the fingerprints of r-process heavy metals in a short GRB – Awarded 9.5 hr of Rapid ToO                                   | GS-2023A-Q-130  |
| 34. | <b>Gemini-South Director’s Discretionary Time 2022B</b> , Unveiling heavy elements from the ultra-long GRB 221009A – Awarded 3.5 hr of Rapid ToO                  | GS-2022B-DD-104 |
| 35. | <b>Gemini-North 2022B</b> , Identifying the fingerprints of r-process heavy metals in a short GRB – Awarded 9.5 hr of Rapid ToO                                   | GN-2022B-Q-130  |

|     |                                                                                                                                                                |                             |
|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| 36. | <b>Gemini-South 2022B</b> , Identifying the fingerprints of r-process heavy metals in a short GRB – Awarded 9.5 hr of Rapid ToO                                | GS-2022B-Q-134              |
| 37. | <b>Gemini-South 2022B</b> , Off-axis afterglows from compact binary mergers – Awarded 8.5 hr of Standard ToO                                                   | GS-2022B-Q-232              |
| 38. | <b>Gemini-South 2022A</b> , Identifying the fingerprints of r-process heavy metals in a short GRB – Awarded 9.5 hr of Rapid ToO                                | GS-2022A-Q-141              |
| 39. | <b>Gemini-South Director’s Discretionary Time 2021B</b> , Probing the unusual long GRB 211227A with Gemini – Awarded 2.1 hr of Rapid ToO                       | DT-2021B-019                |
| 40. | <b>SALT 2025-2/2026-1</b> , SALT Spectroscopy of the rare, nearby Type Ic-BL Supernova EP260321a - Awarded 5 hr of ToO                                         | 2025-2-DD-004/2026-1-DD-003 |
| 41. | <b>SALT 2025-1</b> , SALT Spectroscopy of Rare Transients - Awarded 11 hr of ToO                                                                               | 2025-1-SCI-001              |
| 42. | <b>SALT 2024-2</b> , SALT Spectroscopy of Rare Transients - Awarded 11 hr of ToO                                                                               | 2024-2-SCI-042              |
| 43. | <b>SALT 2024-1</b> , SALT Spectroscopy of Rare Transients - Awarded 11 hr of ToO                                                                               | 2024-1-SCI-042              |
| 44. | <b>Lowell Discovery Telescope 2023A (Co-PI)</b> , Classically Scheduled Imaging and Spectroscopy of Transients and Their Host Galaxies – Awarded 5 full nights |                             |
| 45. | <b>Lowell Discovery Telescope 2022B (Co-PI)</b> , Classically Scheduled Imaging and Spectroscopy of Transients and Their Host Galaxies – Awarded 5 full nights |                             |
| 46. | <b>Lowell Discovery Telescope 2022A</b> , Gamma-ray bursts and their host environments – Awarded 4 half-nights                                                 |                             |

## Presentations

---

### INVITED DISCUSSION PANELS

1. **Dawn of Gravitational Wave Astronomy and Astrophysics (Dawn VII) Meeting.** Invited speaker and panelist. *Multi-messenger Astrophysics in the A# Era*. Vancouver, Canada. June 2024. *Contributed to white paper* (McIver et al.).
2. **Gravitational Wave Physics and Astronomy Workshop (GWPAW).** Discussion panelist. *What Astronomers need to do MMA*. Birmingham, UK. May 2024.

### INVITED TALKS

1. **The Extragalactic Transient Universe.** Invited talk. *EP260321a/SN 2026gzf: The Faintest Shock Breakout Associated with a Broad-Lined Supernova*. Marseille, France (Presented virtually). July 2026.
2. **Pennsylvania State University.** Invited Colloquium (45m). *The Landscape of Relativistic Fast X-ray Transients in the Einstein Probe Era*. State College, PA. March 2026.
3. **NASA's 4th TDAMM Workshop.** Invited GRB Overview Talk (25m). *The Current State of Gamma-ray Burst Astronomy*. Huntsville, AL. October 2025. *Contributed to white paper*.
4. **University of Florida.** Invited colloquia (45m). *Illuminating the role of compact binary coalescence in the multi-messenger era*. Gainesville, FL. February 2025.
5. **GRB+CE Workshop 2024.** Invited talk (20m). *Constraints On the Population of Off-axis Short Gamma-ray Bursts*. Playa del Carmen, Mexico. December 2024.
6. **COSPAR 2024.** Invited talk (20m). *A search for hostless short GRBs with large aperture telescopes*. Busan, South Korea. July 2024.
7. **GROWTH MMA Meeting.** Invited talk (15m). *A structured jet explains the extreme GRB 221009A*. Presented virtually. March 2023.
8. **Union College.** Invited colloquia (45m). *The Transient Universe: Compact Objects Near and Far*. Schenectady, NY. February 2023.
9. **Harvard-Smithsonian Center for Astrophysics (CfA).** Invited talk (45m) at High Energy Seminar. *The Transient Universe: Compact Objects Near and Far*. Cambridge, MA. November 2022.
10. **Lowell Observatory.** Invited talk (15m) at A Decade of Exploration with the Lowell Discovery Telescope. *The host galaxies and environments of short gamma-ray bursts*. Presented virtually. October 2022.
11. **California Institute of Technology (Caltech).** Invited talk (45m) at Astronomy Tea Talk series. *The Transient Universe: Compact Objects Near and Far*. Presented virtually. October 2022.
12. **University of California, Berkeley.** Invited talk (45m) at Explosive Astro talk series. *The Transient Universe: Compact Objects Near and Far*. Berkeley, CA. September 2022.
13. **University of California, Santa Cruz.** Invited talk (45m) at FLASH Seminar. *The Transient Universe: Compact Objects Near and Far*. Santa Cruz, CA. September 2022.
14. **Universidad Nacional Autónoma de México.** Invited talk (45m) at High Energy Astrophysics (HEAP) seminar. *Shedding light on hostless short GRBs with large aperture telescopes*. Presented virtually. March 2022.

### CONTRIBUTED PRESENTATIONS

1. **Celebrating 20 years of Swift Discoveries.** Contributed talk (15m). *Characterization of a peculiar Einstein Probe transient EP240408a*. Florence, Italy. March 2025.
2. **Transients From Space at STScI.** Spark talk (7m). *Characterization of a peculiar Einstein Probe transient EP240408a*. Baltimore, MD. March 2025.
2. **Fast Radio Burst Frontiers.** Contributed talk (15m). *Discovery of Short Gamma-ray Bursts and Magnetar Giant Flares with Current and Next Generation Facilities*. Pittsburgh, PA. March 2025.
4. **Dawn VII Satellite Workshop: Multi-Messenger Astrophysics with GWs.** Contributed talk (15m). *Constraints On the Population of Off-axis Short Gamma-ray Bursts*. Vancouver, CA. June 2024.
5. **Gravitational Wave Physics and Astronomy Workshop (GWPAW).** Contributed talk (15m). *Constraints On the Population of Off-axis Short Gamma-ray Bursts*. Birmingham, UK. May 2024.
6. **GRB50 Meeting.** Contributed talk (10m). *A structured jet explains the extreme GRB 221009A*. Warrenton, VA. August 2023.
7. **High Energy Astrophysics Division (HEAD 20) Meeting.** Dissertation talk (15m). *The Transient Universe: Compact Objects Near and Far*. Kona, HI. March 2023.
8. **241st meeting of the American Astronomical Society (AAS).** Dissertation talk (15m). *The Transient Universe: Compact Objects Near and Far*. Seattle, WA. January 2023.
9. **Kilonova: Multimessenger and Multiphysics.** Contributed Early Career talk (20m) at WE-Heraeus Seminar. *The host galaxies and environments of short gamma-ray bursts*. Bad Honnef, Germany. November 2022.

10. **Lowell Discovery Telescope Partners' Meeting at Boston University.** Contributed talk (15m). *The host galaxies and environments of short gamma-ray bursts.* Presented virtually. November 2022.
11. **IAU Symposium 363.** Contributed talk (20m). *Shedding light on hostless short GRBs with large aperture telescopes.* Presented virtually. December 2021.
12. **Marcel Grossman 16th Meeting.** Contributed talk (15m). *Constraints on kilonova emission in two short GRBs at  $z \sim 0.5$ .* Presented virtually. June 2021.
13. **European Astronomical Society (EAS) Annual Meeting.** Contributed talk (15m). *Constraints on kilonova emission in two short GRBs at  $z \sim 0.5$ .* Presented virtually. June 2021.
14. **Square Kilometer Array (SKA) Science Conference.** Contributed talk (10m). *Constraints on kilonova emission in two short GRBs at  $z \sim 0.5$ .* Presented virtually. March 2021.
15. **237th meeting of the American Astronomical Society (AAS).** Contributed talk (5m). *Constraints on kilonova emission in two short GRBs at  $z \sim 0.5$ .* Presented virtually. January 2021.
16. **Chandra Frontiers in Time Domain Astrophysics.** Contributed talk (15m). *The merger environments of short gamma-ray bursts.* Presented virtually. October 2020.

## Press

---

My research has generated numerous press releases that have led to > 700 news articles as tracked by Altmetrics. A few selected releases and examples are listed below.

### Astronomers Catch Massive Star's Death From the First Explosive Moment

- **NOIRLab:** <https://noirlab.edu/public/news/noirlab2619/>
- **CMU:** <https://www.cmu.edu/mcs/news-events/2026/0805-shock-breakout-supernova>
- **LMU:** <https://www.lmu.de/en/newsroom/news-overview/news/cosmology-an-unusual-death-305b9ff1.html>
- **Reuters:** <https://www.reuters.com/science/astronomers-watch-whole-process-huge-star-dies-2026-08-07/>

### Black Hole Eats Star: Origin of the Longest Gamma-ray Burst Ever Observed

- **NASA:** <https://science.nasa.gov/science-research/black-hole-eats-star/>
- **NOIRLab:** <https://noirlab.edu/public/news/noirlab2531/>

### Teaching Experience

---

- 2019    **Secondary Instructor**, Solar System Astronomy, The George Washington University  
 2017-2019    **Graduate Teaching Assistant**, Physics and Astronomy, The George Washington University

### Mentoring Experience

---

To date I have directly supervised 6 graduate students and 7 undergraduate students. These are students whom with I have met with on a weekly basis to discuss, advise, and collaborate on their ongoing research projects.

\*Resulted in a publication. \*\*Publication in preparation.

#### GRADUATE STUDENTS

**Xander Hall\*** (Graduate student), Carnegie Mellon University (Sep. 2024 - present)  
 Project(s): DESI Transients Survey, DECam gravitational wave follow-up, *Einstein Probe* Fast X-ray Transient follow-up  
 Paper(s): [arXiv:2601.12611](#), [arXiv:2510.24620](#), [arXiv:2510.23723](#), [arXiv:2606.09992](#), [arXiv:2603.15899](#), [arXiv:2605.18973](#)

**Malte Busmann\*** (Graduate student), Ludwig Maximilian University of Munich (Nov. 2023 - present)  
 Project(s): *Einstein Probe* Fast X-ray Transient follow-up with LMU's Wendelstein Observatory  
 Paper(s): [arXiv:2503.14588](#), [arXiv:2510.24620](#), [arXiv:2606.09992](#), [arXiv:2605.18973](#)

**Hannah Skobe\*** (Graduate student), Carnegie Mellon University (June 2024 - Aug. 2026)  
 Project(s): Morphological study of the host galaxies of GRBs with kilonovae  
 Paper(s): [arXiv:2604.06586](#)

**Keerthi Kunnumkai\*** (Graduate student), Carnegie Mellon University (Sep. 2023 - Aug. 2026)  
 Project(s): DECam gravitational wave follow-up and kilonova detectability, Linking BNS and short GRB rates  
 Paper(s): [arXiv:2411.13673](#), [arXiv:2604.05046](#)

**Seth Gagnon** (Graduate student), The George Washington University (Summer 2022)  
 Project(s): *Swift* Deep Galactic Plane Survey X-ray transient classification and follow-up

**Alex van Kooten** (Graduate student), The George Washington University (Summer 2021)  
 Project(s): *Swift* Deep Galactic Plane Survey X-ray transient classification and follow-up

#### UNDERGRADUATE STUDENTS

**Rav Kaur\*** (Undergraduate student), UC Berkeley (Oct. 2023 - Sep. 2024)  
 Project(s): Off-axis afterglow detectability of GW detected BNS mergers  
 Paper(s): [arXiv:2410.10579](https://arxiv.org/abs/2410.10579)

**Reed Barmada** (Undergraduate student), Carnegie Mellon University (Sep. 2024 - May 2026)  
 Project(s): Binary neutron star population synthesis with COSMIC

**Frank Price** (Undergraduate student), Carnegie Mellon University (Sep. 2024 - May 2025)  
 Project(s): Compact object population synthesis with COSMIC

**Jackson Chen** (Undergraduate student), Carnegie Mellon University (June 2024 - May 2025)  
 Project(s): Binary neutron star population synthesis and short GRB galactocentric offsets

**Samanvita Singhania** (Undergraduate student), Carnegie Mellon University (June 2024 - Dec. 2024)  
 Project(s): Binary neutron star population synthesis and short GRB galactocentric offsets

**Dylan Rossi** (Undergraduate student), Carnegie Mellon University (Jan. 2024 - Aug. 2024)  
 Project(s): Transient classification with DECam and DESI (DESIRT and 2DTS)

**Aidan Catalano** (Undergraduate student), Carnegie Mellon University (Summer 2023 & 2024)  
 Project(s): Transient classification with DECam and DESI (DESIRT and 2DTS)

## Outreach & Professional Development

---

### CONFERENCE ORGANIZATION

2026 **SOC Member**, *Chandra's Dynamic Universe*  
 2024 **SOC Member**, *Swift Senior Review Workshop*

### PEER REVIEW

2026 **Journal referee**, *Classical and Quantum Gravity*  
 2026 **ToO Panel Member**, *Chandra Peer Review (Cycle 28)*  
 2026 **TAC Member**, Gemini Large and Long Proposal (LLP) TAC  
 2025 - now **Proposal reviewer**, *Chandra Distributed Peer Review (Cycles 27, 28)*  
 2024 - now **Proposal reviewer**, *James Webb Space Telescope (JWST) Guest Observer Peer Review (Cycles 4, 5)*  
 2024 **Proposal reviewer**, NASA Astrophysics Data Analysis Program (ADAP)  
 2024 **TAC Member**, *Chandra Peer Review (Cycle 26)*  
 2024 - now **TAC Member/TAC Chair**, NOIRLab Time Allocation Committee (TAC)  
 2024 - now **Journal referee**, *The Monthly Notices of the Royal Astronomical Society (MNRAS)*  
 2024 - now **Proposal reviewer**, *James Webb Space Telescope (JWST) Director's Discretionary Time*  
 2024 **Proposal reviewer**, Israel Science Foundation  
 2024 - 2026 **Co-chair**, Southern African Large Telescope TAC for Carnegie Mellon University  
 2023 - 2025 **Member**, McWilliams Fellowship Hiring Committee, Carnegie Mellon University  
 2023 - now **Journal referee**, *Nature Astronomy*  
 2023 - now **Journal referee**, *Astronomy & Astrophysics (A&A)*  
 2022 - now **Journal referee**, *The Astrophysical Journal (ApJ)* and *Astrophysical Journal Letters (ApJL)*  
 2023 **Proposal reviewer**, Subaru Telescope Time Allocation Committee  
 2023 **Proposal reviewer**, Italian Time Allocation Committee for TNG/REM  
 2022 **Proposal reviewer**, Gemini Observatory Canadian Time Allocation Committee (CanTAC)

### PROFESSIONAL MEMBERSHIPS

2026 - now **CubeRAX Science Team (NASA APRA Mission Concept)**, Science Team Member  
**XTRA Science Team (NASA SMEX Mission Concept)**, Explosive and Multimessenger  
 2025 - now Transients Science Team Lead; Head of FXT-GRB Science Working Group  
 2025 - now **International Astronomical Union (IAU)**, Junior Member  
 2024 - 2026 **AXIS Probe Science Working Group**, Member  
 2024 - now **LSST Transients and Variable Stars (TVS) Science Collaboration**, Member  
 2023 - now **Gravitational Wave Multi-Messenger Astronomy DECam Survey (GW-MMADS)**,  
 Member/Observer  
 2023 - now **DECam Alliance for Transients (DECAT)**, Member/Observer  
 2023 - now **DECam Survey of Intermediate Redshift Transients (DESIRT)**, Member/Observer  
 2023 - 2026 **The Dark Energy Spectroscopic Instrument (DESI)**, Junior Member  
 2023 - now **HEASARC Users Group (HUG)**, Member  
 2020 - 2023 **Gamow Explorer Science Team (NASA MIDEX Mission Concept)**, Member  
 2020 - 2023 **Swift Deep Galactic Plane Survey (DGPS)**, Observation and Analysis Lead  
 2020 - 2023 **MeerKAT Galactic Plane Survey**, Member

## WEEKLY COLLOQUIA

2024 - 2025 **McWilliams Center Astronomy Seminar Series**, Organizer  
 2023 - now **CMU Multimessenger Astronomy Meetings**, Organizer/Presenter  
 2023 - now **CMU Astronomy Journal Club**, Member/Presenter  
 2022 - 2023 **GWU Astronomy Data Analysis Seminars**, Organizer/Presenter  
 2022 - 2023 **UMD Transient Astronomy Meetings**, Member/Presenter  
 2019 - 2023 **NASA GSFC GRB Lunch**, Member/Presenter  
 2018 - 2023 **GWU Astronomy Group Meetings**, Member/Presenter

## SERVICE AND OUTREACH
